

Retrospective: FAB Sprint 3

Overview

Date	13 Oct 2023
Team	Group 1 - FAB 5
Participants	@Naveen Maheswaran @Sean McCrossan @Nikodem Adamski @Oluwatobi Omole @Umama Sumlin Tasnuva

Retrospective

Start doing	Stop doing	Keep doing
<ul style="list-style-type: none">• add stories to sprint before starting the sprint.• start meeting in person	<ul style="list-style-type: none">• adding stories after sprint started• stop taking too much work	<ul style="list-style-type: none">• git flow• delivery as planned
Review system architecture with all teammates and amend it as required	putting too much on plate before getting the minimum requirements done	Nice and detailed comments for PR on GitHub
Summarise interview feedback, gather key feature list.	putting too much emphasis on ui, d3. more on getting a working product.	continue interviews, keep communicating on jira.
Cleaning up python code	Hardcoding environment variables	Using OOP
Set up team mates python environment.	Not using virtual environments	Python set up packages.
Code stability practices, linting etc	Coding new features	Keep coding unit tests.
Start commenting code,
